

ETHEREUM Black

PROJECT

Ethereum black is a free open source project that was created by a small group of ethereum enthusiasts from diverse backgrounds. In contrast to the other prominent Ethereum forks, Ethereum Black was specifically designed from the beginning to inspire innovation in the Ethereum black ecosystem and give value to the vision of decentralization. Whereas the others were born from hostility and an ambition to dominate, Ethereum black arises from a desire to protect Ethereum and ensure that it not only maintains its position as the dominant cryptocurrency but continues to grow until its liberating roots stretch deep into the economic life of all nations.

Future development

- Core protocol
- Lightning network
- Bech32 addresses
- Sidechains
- Cross-chain atomic swaps
- Decentralized exchange

Operational and costs

- 17+ full nodes on 8 continents
- 7+ DNS seeds
- System administration
- Security and penetration testing

Future social action

- Economic Development Fund:
- Blockchain Education Fund:
- GPU Mining Infrastructure Fund

Future communication costs

- Social media
- Design assets
- Press releases
- Meetups and developer conferences

ROADMAP

08/2017 ::: Idea

11/2017 ::: Launching Airdrop and Donate

- 1st Airdrop 20 Tokens (More than 7000 subscribers benefited)
- 2nd Airdrop 15 Tokens (More than 1400 subscribers benefited)
- 500,000 ETBT completed Tokens have been reserved for Donate

12/2017 ::: Burn 500,000 ETBT

Because of the high price of Ethereum we decided to burn a 500,000 ETBT tokens. we will send to contract address and can never be put in circulation again

- 13/12/2017 Burn 250,000 ETBT
- 15/12/2017 Burn 250,000 ETBT

05/2018 ::: Hard-Fork

- Start hard-fork at block 5600000 and build ethereum black one-to-one.who hold ethereum receive ethereum black in sam wallet.
- Start mining for developer (5600000-5687500) for change 3500000 ETB-token to 437500 ETB. 8ETBT = 1ETB (+20%)

10/2017 ::: Technical Specification

Technical Specification and create website

12/2017 ::: Listing Token in Exchanges and CMC

- [EtherDelta](#) (listed)
- [Idex Market](#) (listed)
- [token store](#) (listed)
- Yobit (listing coming soon)
- Coinexchange (listing coming soon)

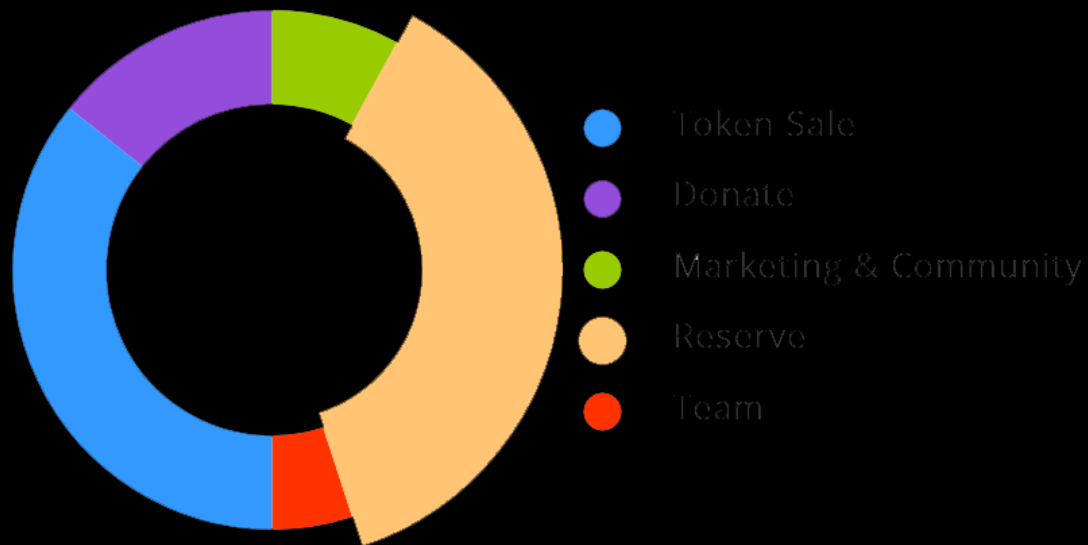

03/2018 ::: Main-Test

Launching Main-Test and test network

06/2018 ::: Mining and Wallet

- Start public mining at block 5687500
- Launching the wallets
- Add ETB to exchange

TOKEN DISTRIBUTION

TOKEN WALLET

ETB-Token (ETBT) – is a smart-contract on the Ethereum platform and Ethereum Black platform. Its design follows widely adopted token implementation standards known as ERC20.

Token Address	TOKENSYMBOL	DECIMALS	TOTALSUPPLY
0x9d5b592b687c887a5a34df5f9207adb2c2db3aec	ETBT	18	3 500 000 ETBT

What is Ethereum black ?

Ethereum Black is a fork of the Ethereum blockchain. At block 5600000, Ethereum Black miners will begin creating blocks with a new proof-of-work algorithm, and this will cause a bifurcation of the Ethereum blockchain. The original Ethereum blockchain will continue on unaltered, but a new branch of the blockchain will split off from the original chain. The new branch is a distinct blockchain with the same transaction history as Ethereum up until the fork, but then diverges from it. As a result of this process, a new cryptocurrency born. In general, our aim is to have profitable, secure and anonymous trading.

How long do Ethereum black transactions take?

In ideal circumstances an Ethereum transaction takes under 5 seconds.

What wallet should I keep my ETB in to make sure I will receive ETBT?

Some wallets may offer you direct access to your ETB, while others may require you to take additional technical steps. Verified wallets that support ETBT and ETB side-by-side will be listed on the ETHEREUM BLACK home page. We will publish guides for retrieving ETB from the most popular wallets, including Ethereum black Core.

How can I get Ethereum black?

Everyone who held Ethereum black when block 5600000 was mined will automatically receive Ethereum Black at the rate of 1 ETB = 8 ETBT. (If you had 100 ETBT at the time of the fork, you will receive 12.5 ETB.)

ETHEREUM Black
